

GOAL № 1: THE ERADICATION OF THE HUNGER

More than a **millard of persons** suffer from the world **hunger**. This figure decreases on average in **6 millions a year**. But this **decline would have to pass in 28 millions to reduce by half the number of persons** badly fed by **2015**, objective fixed by the UNO.

30 countries of sub-Saharan Africa suffer from malnutrition, that is more half of 50 countries listed(counted) by the United Nations Organisation for the food(supply) and the agriculture(farming) (FAO). Somalia holds(detains) the sad record of malnutrition of the planet: 75 % of his(her) population suffers from it.

3 600 calories swallowed on average **daily by an American**: **67 % more** than an **African**!
